

GroceryGetter

Sydney, Australia

December, 2018

To whom it may concern,

I can confirm that Ayush Goswami has been working on a full time basis as a remote front end developer for GroceryGetter based in Sydney from April, 2018 to December, 2018. He is an exceptional front end developer and during his time at GroceryGetter worked with the following technologies:

- HTML
- CSS
- Javascript
- Angularjs
- Gulp
- Ionic
- API integration
- Responsive web

He was an exceptional asset to the team and is very talented. He would be an asset to any company that he joins in the future. He is extremely disciplined and was very reliable as a remote developer and always had the initiative to stay focused and finish tasks on time and to a very high standard. I would highly recommend Ayush Goswami and hope to be able to have the pleasure to hire and work with him again in the future.

Unfortunately GroceryGetter had to cease its tech team overseas and therefore was no longer able to employ Ayush due to business issues internal to GroceryGetter. For any questions, queries or references about Ayush, please do not hesitate to contact me.
